SATELLITE STOREROOMS

**Tried and Trusted
Solutions**

PTIsolutions

SATELLITE STOREROOMS Tried and Trusted Solutions

Lower your
consumption
by at least

25%

PTIsolutions satellite storerooms have many advantages...

- Allow companies to concentrate efforts on more essential business;
- Advise and support management in efficient storeroom practices;
- Manage storeroom costs efficiently and suggest more profitable and effective solutions;
- Ensure balance between operational requirements and infrastructures;
- Reduce costs related to inventory overstock;
- Support users in daily storeroom activities.

"Manage, improve
and optimize
storeroom
services"

Inventory Solutions Made Simple

DistriMag^{MC}

The solution for
high-volume and
high management
cost items

LockMag^{MC}

The solution for
oversized and
specialized items

GoMag^{MC} & Mobile^{MC}

The solution for
dynamic tool-sharing
management

InMag^{MC} & Mobile^{MC}

The solution for
managing storeroom
inventory

DistriMag^{MC}

La **DistriMag^{MC}** can contain an average of **35 to 40 items** or even up to **60!**

The solution for high-volume and high management cost items

This satellite storeroom allows you to considerably reduce costs related to high volume consumables such as safety and security items (gloves, glasses, masks), abrasives, industrial supplies, items for welding, etc.

In order to optimize the distribution of high-volume usage items, we can combine lockers or scanners to control oversized, bulk or specialized items.

The **DistriMag^{MC}** is managed by two independent software programs which are very reliable and easy-to-use. The data is located at the customer's site, which ensures the integrity and security of the network.

ADVANTAGES

- Made in Canada
- Rugged, heavy-duty construction
- Easy to use
- Oversized doors allow distribution of different sized articles
- Identification with bar code, magnetic card, proximity card or even biometric scanner

KEY FEATURES

- Multi-language interface
- Custom configuration*
- 24/7 customer service
- Generates more than 250 reports
- Software located on your network
- Easy to interface with ERP software

VirtuMag^{MC}

A virtual storeroom, linked and controlled by **DistriMag^{MC}**, that offers you the possibility to order, through the **DistriMag^{MC}** interface, items that are not physically kept on inventory.

LockMag^{MC}

The solution for oversized, bulk and specialized items

Linked to and controlled by the **DistriMag^{MC}**, the **LockMag^{MC}** is an automated distribution system for heavy or oversized specialized items. It offers the same advantages as the **DistriMag^{MC}** in addition to widening the scope of products being distributed.

Integrated into the same software, manage **DistriMag^{MC}** and **LockMag^{MC}** in no time at all!

ADVANTAGES

- Made in Canada
- Rugged, heavy-duty construction
- Standard units with 6, 8 or 10 doors
- Optimized management of large, heavy or bulk consumables
- 24/7 consumption traceability

KEY FEATURES

- Multi-language interface
- 24/7 customer service
- Software located on customer's network
- Generates more than 250 reports
- Easy to interface with ERP software
- Possibility of custom-made units

1
Employee
Identification

2
Item
Selection

3
Employee
retrieves the
item and
quantities are
automatically
recorded

4
End of the
transaction

5
Transaction is
transferred
and stored on
the software
server

GoMag^{MC} & Mobile^{MC}

The solution for dynamic tool-sharing management

GoMag^{MC} controls, manages and plans the ins and outs of tools all the while minimizing the time in managing and requesting items.

GoMag^{MC} is also capable of managing warranties, maintenance cycles and tool traceability. Can be used with lockers or a PDA.

ADVANTAGES

- 24/7 tool traceability
- Tool warranty follow-up
- Reduction of time wasted looking for tools
- Specification of tool condition upon its return
- Possible to interface with ERP software

KEY FEATURES

- User friendly software
- Software located on customer's server
- Generates more than 250 reports
- Controls tools ins and outs by identifying users

1
Employee Identification

2
Item retrieval or return is recorded

3
Employee retrieves the tool and the transaction is automatically recorded

4
End of transaction

5
Transaction data is transferred to GoMag software

Specifications

DistriMag^{MC}

The solution for high-volume and high management cost items

Dimensions:

Height: 76"
Width: 44"
Depth: 36" (86 cm)

Weight:

700 Lb (284 kg)

Electrical:

115 VAC, 1.2 Amps

Trays:

Standard: 6 Maximum: 7

Selections:

Standard: 35 Maximum: 70

Selection capacity:

5 to 30 units

Maximum capacity:

2100 units

Coil unit depth:

½" to 3 ½" (1.3 cm to 8.9 cm)

Network connection:

RJ45 Connection - Static IP address - Subnet Mask - Central Terminal

LockMag^{MC}

The solution for oversized and specialized items

Dimensions:

Height: 76" (193 cm)
Width: 16" (41 cm)
Depth: 18" (46 cm)

Weight:

150 lb (68 kg)

Electrical:

115 VAC, 1.2 amps

Door / Section Quantities:

6 - 8 - 10

Dimensions:

6 Doors: 12" x 10" x 17" (Width-Height-Depth)
8 Doors: 12" x 8" x 17" (Width-Height-Depth)
10 Doors: 12" x 6" x 17" (Width-Height-Depth)

Other sizes may be offered upon request.

GoMag^{MC} & Mobile^{MC}

The solution for dynamic tool-sharing management

Dimensions:

Height: 76" (193 cm)

Door / Section Quantities:

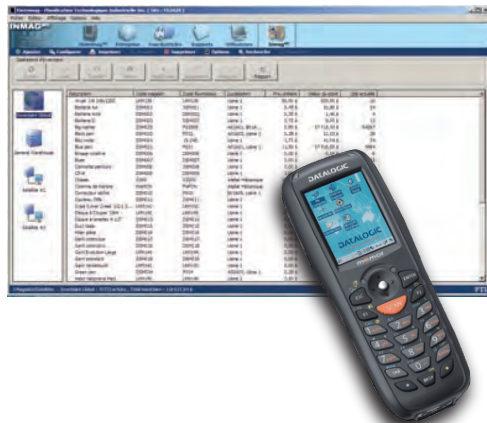

6 - 8 - 10

Dimensions:

6 Doors: 12" x 10" x 17" (Width-Height-Depth)
8 Doors: 12" x 8" x 17" (Width-Height-Depth)
10 Doors: 12" x 6" x 17" (Width-Height-Depth)

Other sizes may be offered upon request.

InMag^{MC} & Mobile^{MC}

The solution for storeroom inventory management

InMag^{MC} is a management module for factory storeroom articles. Usually used with a barcode system, it is designed with a user-friendly software system which allows you to manage all of the items in your storeroom.

ADVANTAGES

- Generates up to 250 consumption reports
- Exports data to other software
- Possible interfacing of data to ERP software
- Allows you to view your inventory in real time
- Allows the entry of on-site inventory

KEY FEATURES

- Quantity management
- Item identification
- User identification
- Manage the ins and outs of items
- Automated restocking e-mails
- Manage multiple storeroom locations

**Employee
Identification**

**Item is
selected
and retrieved**

**Recording of
quantities
Ins / Outs**

**End of
transaction**

**Transaction
data is
transferred
to the DMMS**
